

# Instructions for pasting paper archery target faces on cardboard.

Joe Rozmus NCFAA President / Director 03/11/2018

These directions refer to the set up at the DCWC, but can be used by any club to create their own targets.

## Supplies

All materials are located in the archery storage container to the left.

- Target faces are organized by type and size. Cardboard is organized by size.
- Dry wheat wallpaper paste, brushes, gallon buckets, razor knife, mixing sticks are on the shelf
- All you need is a couple gallons of tap water and a tape measure.
- Cut corrugated cardboard from inside container, if required. Some may be pre-cut inside the storage container.

Set up a plastic 6ft fold up table to work on. (Use two if you like.) There is always one near the shelter or container. Bring out the materials you plan to use.

## Instructions

1. Pour one cup (8 oz.) powdered wheat paste and 3/4 gallon of water into a one gallon container.
2. Mix well with mixing stick or tool. Consistency should be very watery. Add more water if or when necessary, as the mixture tends to thicken while sitting.
3. Lay a stack of pre-cut cardboard on the worktable for the target face size you are going to paste
4. Bring out a stack of that size paper target faces and set it near this cardboard.
5. Make sure the brush provided is clean and soft / pliable. Not full of old glue (stiff / ridged). Clean up with water.
6. Dip this brush heavily into ready glue mixture.
7. Paint one side of one piece of card board with wet glue. Get complete coverage on cardboard.
8. Apply one piece of target paper to glued cardboard. Smooth the target paper down evenly with your hand. Make it stick to the glued cardboard. Try to have very few, if any, air bubbles between the paper and cardboard. (Practice makes perfect.)
9. Learn how to arrange / align the different target faces on each board as required. Ensure all the writing is correctly placed right side up and each piece is facing the same direction.
10. Lay freshly pasted target faces out to dry. Out in the sun is best.
11. Stack each different finished target size together. Organize and then put away in the storage container. Each size in its proper location on shelving lying flat with heavy wooden target box laid on top of to help keep flat.
12. Clean and put away tools.

## NFAA Completed Target Face Specifications

Here are how targets are to be arranged. Remember target face sizes are written on the corner of every target face measured in centimeters (cm).

The following is each type of official NFAA Field Archery targets that are used.
